

Sampling Guidelines for Food Vendors and Demonstrators at Events

Distribution of food samples to the public allows consumers to sample items before purchasing. It allows sellers to introduce new and less common varieties of produce and other items as well as demonstrate the quality, taste, and freshness of their products to consumers. Sampling has a positive effect on the sales of products at food facilities special events, etc. To provide safe samples to the public, the following guidelines developed from the Kentucky Retail Food Code must be followed:

Potentially hazardous foods (PHFs) / **new term: Time/Temperature Control for Safety (TCS) foods will require a temporary food service permit (<https://www.lfchd.org/temporary-food-service/>). TCS foods require temperature control and include Grade A dairy, meats, garlic and oil mixtures, and various produce items. For questions as to what constitutes TCS food, please call (859) 231-9791 and ask to speak to an inspector.**

1. Keep samples in clean, covered containers approved by this Department. A clear plastic container with a hinged lid or a plate with a clear dome cover would be effective and still allow the customer to see the product.
2. The vendor must distribute samples in a sanitary manner. Use toothpicks or disposable utensils to distribute the samples. This is to avoid contact with the consumer's hands.
3. Clean, disposable plastic gloves can be used when cutting food samples (NO bare-hand contact).
4. A hand washing station must be provided. At a minimum provide a five (5) gallon water container with a dispensing valve to leave hands free for washing; a wastewater container to contain the waste; a soap dispenser and paper towels.
5. Food intended for sampling shall be washed, or cleaned in another manner, free of any soil or other material by potable water so that it is wholesome and safe for consumption, if applicable.
6. Potable water shall be provided for hand washing and sanitizing as approved by this Department.
7. Utensils and cutting surfaces shall be smooth, nonabsorbent, and easily cleaned or disposed of as approved by this Department.
8. Utensil washing shall be provided if samples are prepared onsite. Provide three containers, for washing, rinsing, and sanitizing. Use approved sanitizer - chlorine, iodine, or quaternary ammonium in approved concentrations. Provide a method for testing sanitizer concentration.
9. Utensil and hand-washing wastewater shall be disposed of in a facility connected to the public sewer system.
10. Approved toilet and hand washing facilities shall be available within 60 meters (200 feet) of the premises.
11. No live animals, birds, or fowl shall be kept or allowed within 6 meters (20 feet) of any area where food is stored or held for sale. This does not apply to guide dogs, signal dogs, or service dogs when used following the American Disabilities Act (ADA).
12. All garbage and rubbish shall be stored, and disposed of, in a manner approved by this Department.
